Use example image files:
filename
earth.gif
import-pcolors filename
import-drawing filename

Use your own image files:
import-pcolors user-file
import-drawing user-file

world-width
401
world-height
401

go

Just for fun:
cycle patch colors
setup

Command Center

observer>

The image shows a graphical user interface for a NetLogo environment. At the top, there are three tabs: 'Interface', 'Information', and 'Procedures'. Below the tabs is a toolbar with icons for various actions: Edit, Delete, Button, Slider, Switch, Chooser, Monitor, Plot, Output, and Text. The main workspace contains several control elements. On the left, there are two buttons labeled 'clear-patches' and 'clear-drawing'. Below these are two sections for image file selection. The first section, 'Use example image files:', includes a text input field with 'filename' and a dropdown menu showing 'earth.gif', followed by two buttons: 'import-pcolors filename' and 'import-drawing filename'. The second section, 'Use your own image files:', includes two buttons: 'import-pcolors user-file' and 'import-drawing user-file'. To the right of these sections are two monitors displaying 'world-width 401' and 'world-height 401'. Below the monitors is a 'go' button. At the bottom left, there is a 'Just for fun:' section with two buttons: 'cycle patch colors' and 'setup'. On the right side of the workspace is a 3D view window showing a realistic Earth from space. Below the workspace is a 'Command Center' with a 'Clear' button and a text input field containing 'observer>'. The 3D view window has a toolbar with navigation and editing tools and a '3D' label.
