Our Definition

Consists of networks of sensors attached to objects and communications devices, providing data that can be analyzed and used to initiate automated actions

IoE: Creating Value by Connecting the Unconnected

Networked Connection of People, Process, Data, and Things

People

Connecting People
in More Relevant,
Valuable Ways

Process

Delivering the Right
Information to the Right
Person (or Machine)
at the Right Time

Internet of Things

Connecting Physical
Devices and Objects to the
Internet and Each Other for
Intelligent Decision Making

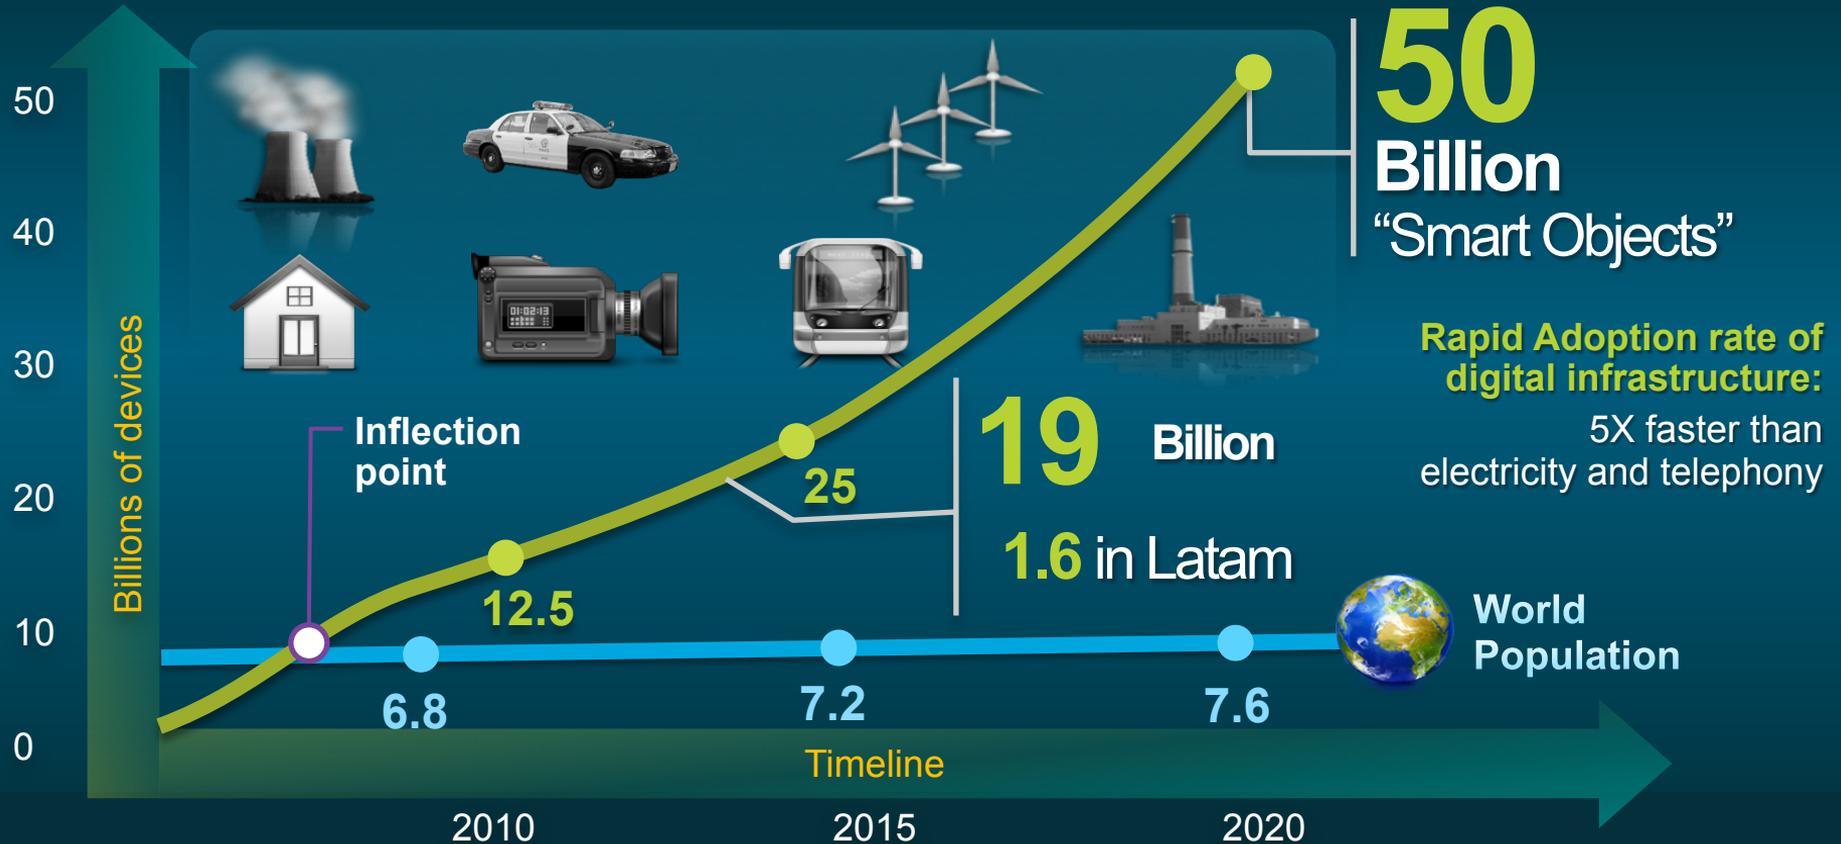

Data

Using Data for
Decision Making

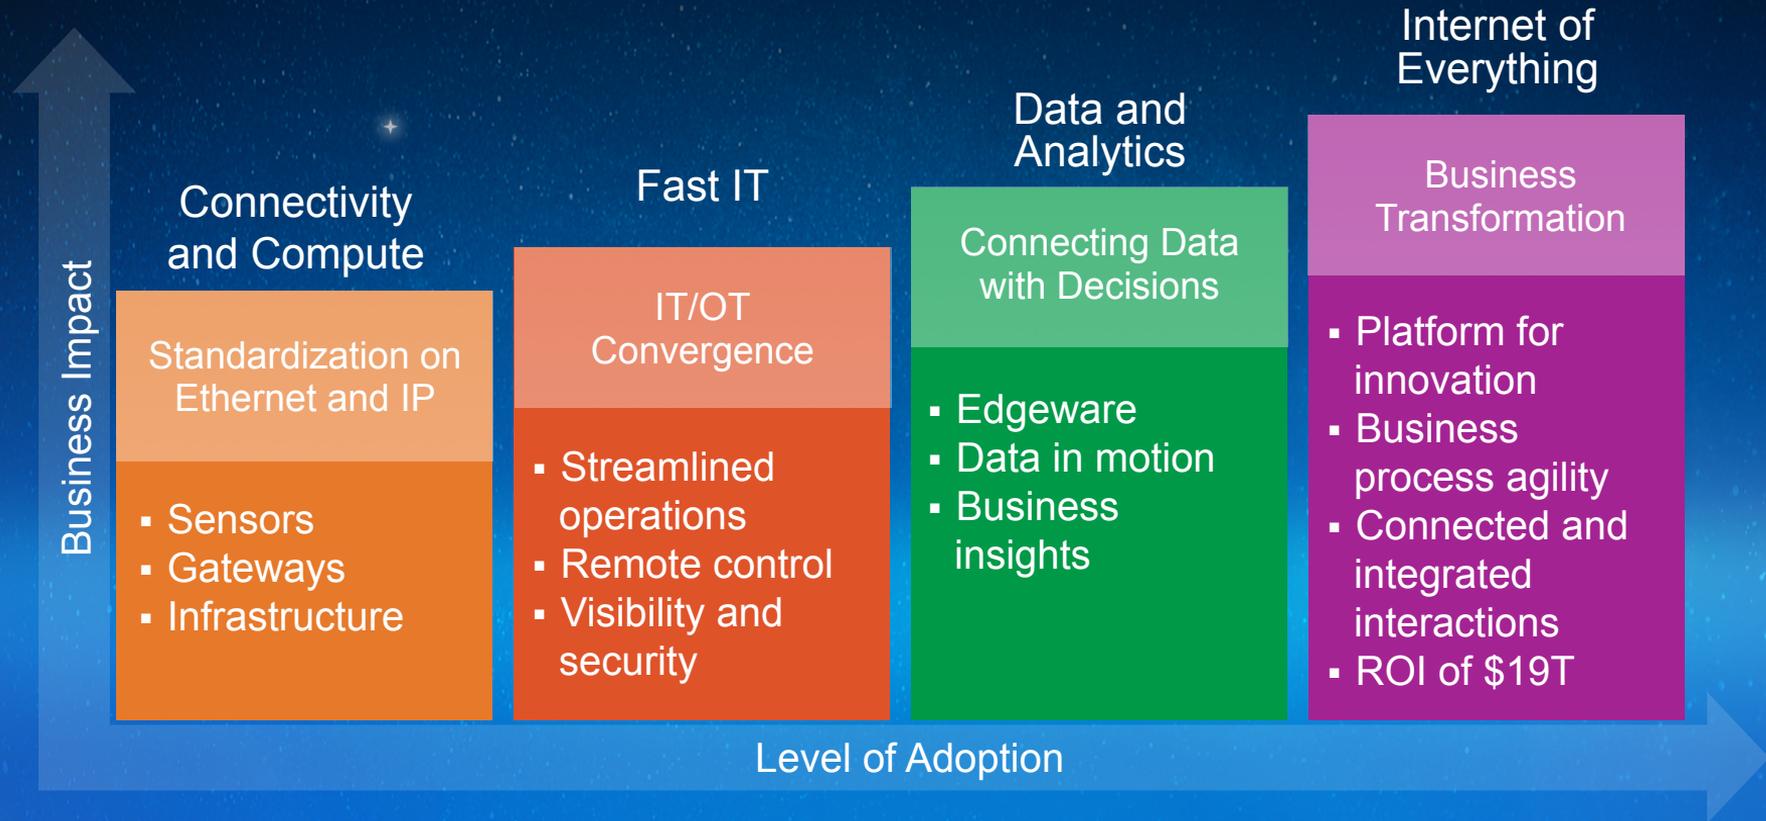

\$19T

Increasingly Everything will be Connected to Everything

IoE Journey to Value

Smart Cities

Cities Have Traditionally Addressed These Issues in Silos

Every city department makes investments independently resulting in:

- No sharing of infrastructure costs and IT resources
- No sharing of intelligence/information, e.g., video feeds, data from sensors, etc.
- Waste and duplication of investment and effort
- Difficulty in scaling infrastructure management

Traffic
management

Public
safety

City
lighting

Pollution/
environment

Waste
management

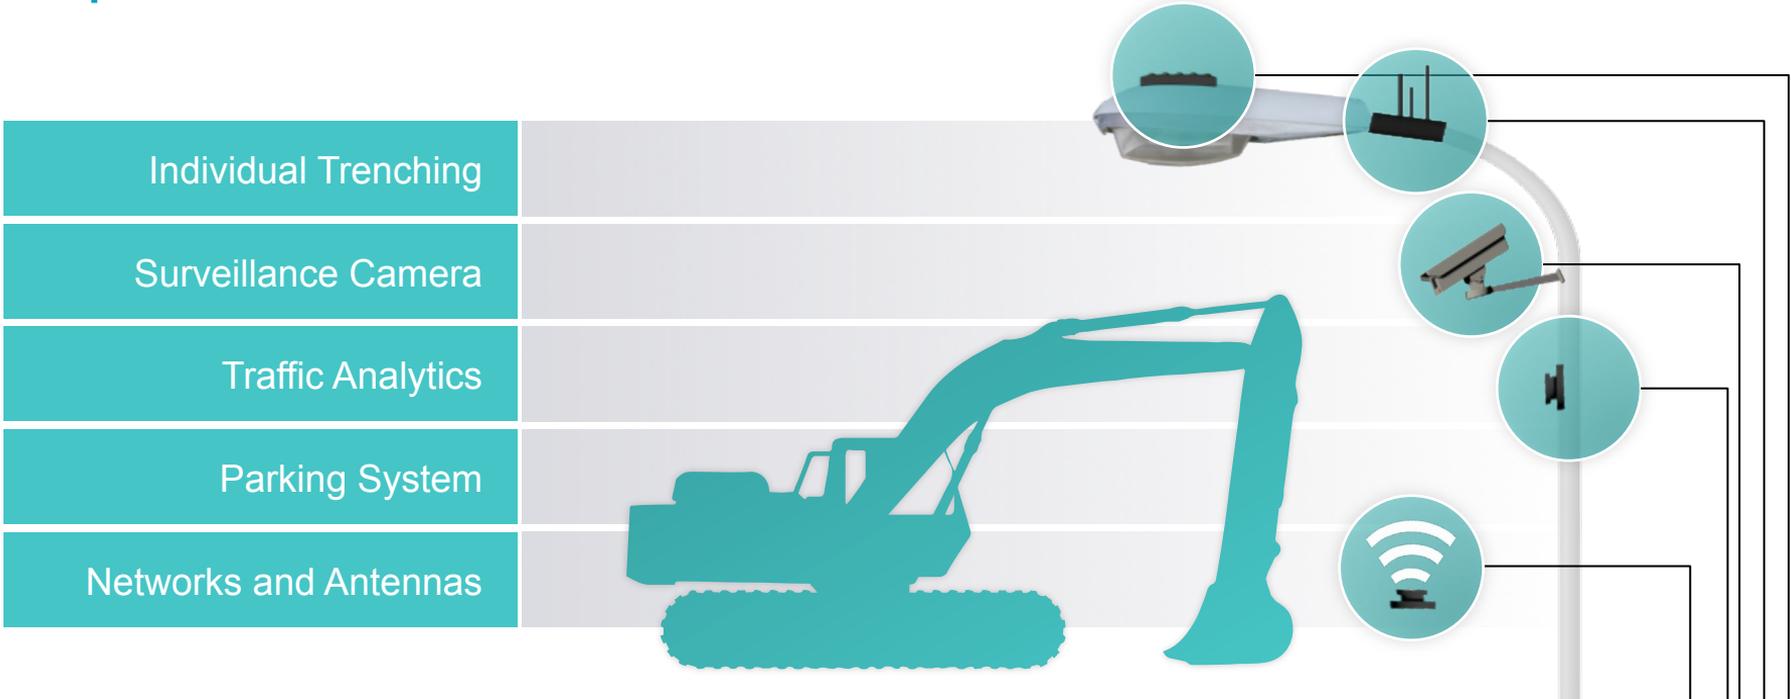

Parking
optimisation

This fragmented approach is inefficient, has limited effectiveness, and is not economical

Incremental Decision Making Leads to Duplicate Investment in Infrastructure, Labor, Network

Transportation

Utilities

Convergence

Safety and Security

Environment

Cities need a CONVERGED approach that breaks these silos that lowers TCO and unlocks new use cases

What do we mean by 'Convergence' for Cities

Unified Management

1 Smart+Connected City Parking

Give citizens live parking availability information to reduce circling and congestion

2 Smart+Connected City Traffic

Monitor and manage traffic incidents to reduce congestion and improve livability

3 Smart+Connected City Safety & Security

Automatically detect security incidents, shorten response time, and analyze data to reduce crime

4 Smart+Connected City Location Services

Provide view of people flow data to aid planning and leverage location data for contextual content and advertising

5 Smart+Connected City Street Lighting

Manage street lighting to reduce energy and maintenance costs

Common Data & Data Models

Shared Network

Solution & Use Cases Overview

Smart+Connected Spaces

S+C City Parking

S+C City Traffic

S+C City Operations Center

Business
Outcome

**Productivity
Improvement**

Parking Revenues

Citizen Mobility

**Control Room
Optimization**

Key
Capabilities

Workplace Transformation

- Room & Workstation Scheduling
- Integration with CTG portfolio
- Integration with EN

Parking Asset Value Enhancement

- Live Parking availability information for citizens
- Live violation reporting for enforcement officers
- Analytics for city planners

Traffic Incident Management

- Live Detection of traffic incidents
- Verification of incident type for response
- Analytics for planners

Unified Management of City Infrastructure

- Integrated Control
- Screen Layout Formation
- Input Collection
- Transmission/Distribution
- Multi-Display Operations

Solution
BOM

Manufacturing

Solution & Use Cases Overview

Connected Factory Automation

Connected Factory Energy Mgmt

Connected Factory Wireless

Connected Factory Security

Business
Outcome

Production Efficiency

Energy Efficiency

Cost Reduction

**Secure Production
Access**

Key
Capabilities

Factory Automation

- Rapid Fault Isolation
- Flexible manufacturing
- Converged NWs (TCO)
- REP (resiliency)
- Zero touch deploy
- App and Data Integration

Energy Management

- Energywise
- FAN (Field area NW) for 900MHz wireless mesh

Factory Mobility

- Mobile Controls visibility
- Wireless tooling
- Wireless I/O
- Asset Management
- Mobile video
- Mobile Applications

Factory Security

- Identity Services
- Physical Security
- In-line machine & controls security
- Secure Remote Access
- Data/ App Service Access

IoE Retail

Solution & Use Cases Overview

Store in a Box

CMX Digital Experience

Remote Expert/ Mobile Advisor

Digital Media Store Experience

Business Outcome

Increase operational efficiency and mitigate risk

Enhance shopper experience

Enhance shopper experience and drive revenue growth

Enhance shopper experience and drive revenue growth

Key Capabilities

- Platform for innovation and growth
- Reduce costs via consolidation
- Integrate store systems with ecommerce
- Add cloud to store
- Deliver new services

- New understanding of customer behavior
- Easy, secure onboarding of mobile devices
- Wayfinding
- Targeted advertising and promotions in real time

- Expert advice at the point of consideration/sale
- Scale staffing resources
- Cross sell and upsell
- Accelerate sales cycle

- More media rich environment for shoppers
- Highlight products/promotions to increase sales
- Promote the brand with video and advertising

Solution BOM

- Unified Access
- Desktop Virtualization
- Cloud-ready infrastructure
- ISRG2 Family
- UCS-E/UCS-C
- IOS/ASA FW/Sourcefire

- CMX Analytics/Meraki Analytics
- Cisco Physical Security
- Social Analytics

The Internet of Everything is here..!!

People

Connecting people in more relevant and valuable ways.

Process

Delivering the right information to the right person (or machine) at the right time.

Data

Leveraging data into more useful information for decision making.

Things

Physical devices and objects connected to the Internet and each other for intelligent decision making.

People-to-People + People-to-Machine + Machine-to-Machine

Thank you
