Linda,

Could you please send a copy of the link for the smart sheet that would allow CUDI to request access to our AWS Direct Connect Service. CUDI lands in El Paso on a 10G port, and will want access, probably at Layer 2, to our AWS Direct Connect Hosted Connect service in Dallas or San Jose.

We should treat this request as we would any of our regional connectors. So, once the form is completed we should set up a call with our NOC.

CUDI is eager to have the connection up in time for a workshop they are holding in conjunction with the Red Clara meeting in Cancun on September 2-5, 2019.

Good afternoon team – I just received confirmation from the AWS Direct Connect team that there are no restrictions for I2 to support CUDI/Mexico with Direct Connect. Looking forward to hearing how this relationship progresses, and always feel free to reach out to me if you have any questions.

Sincere regards, Ivis
